PROFESSIONAL SUMMARY

Product marketing leader and founder with 5+ years leading go-to-market, positioning and growth for technology products across the United States, Germany and Nigeria. I own launches end to end, from market insight and positioning to rollout, conversion and the systems that make results repeatable. I pair commercial judgment with hands-on AI building: I founded Creataws and built and launched Opptiq, an AI product that reached 250+ organic users in two weeks with no ads.
